

**Arbour Soft Tissue Centre & Naturally Fit**

**Region:** Southwestern Ontario

**Location:** Kitchener

**Type of Project:** Design Build

This was a design-build project that involved the renovation of an older existing medical building to accommodate a physiotherapy clinic, as well as a specialized training facility. The project also involved substantial upgrades to existing building assemblies to comply with the Ontario Building Code and Electrical Safety Authority. The finished facility provides a flexible working environment for the health care professionals.
