

Region: Southwestern Ontario
Location: Cambridge
Owner/Client: Cambridge Memorial Hospital
Architect: N/A
Type of Project: Renovations

Auditorium Renovation

This highly successful auditorium/conference room renovation project was the result of a collaborative design with client which provided a cost efficient renovation solution. The project was completed within client's tight timelines and stipulated budget. Work was carried out without disruption to their restrictive health care environment and infection control requirements.

Patient Resource Room

This project consisted of demolition, construction and collaborative design of the Oncology Department dietician's office and patient resource room. Demolition and construction in this sensitive environment was carefully coordinated to allow facility to remain in operation.
