

## Toys 'R' Us/Babies 'R' Us Store #3575

**Region:** Southwestern Ontario

**Location:** Mississauga

**Owner/Client:** Toys 'R' Us Canada

**Architect:** BJC Architects

**Type of Project:** Construction Management

A 50,000 sq. ft. leasehold improvement with a very aggressive schedule that required teams working through the Christmas and New Year's break. This project involved integration of landlord and contractor's work, as well as coordination and installation of five tractor trailer loads of owner-supplied equipment. The facility was completed on schedule, allowing the client to open to the public ahead of schedule. RHC's construction team was able to create a collaborative working environment that ensured client changes were incorporated into the work program without disrupting the overall project schedule.
